AI-Powered Full-Stack Developer | MVP Builder | Remote Tech Specialist

Resourceful and fast-learning full-stack developer who builds MVPs and complete web apps using modern stacks and AI tools like ChatGPT to speed up development and problem-solving. Proven track record delivering solo and team projects from scratch to production. Passionate about solving real problems for startups, businesses, and creators.

EDUCATION

Code Lab Academy Bootcamp • Remote • 08/2024 – 01/2025

Completed a comprehensive bootcamp covering HTML, CSS, JavaScript, React.js, Node.js, and MongoDB.

Built hands-on projects, including the graduation project <https://github.com/Teo-iakovou/LemoAPP>

CERTIFICATIONS

CodeLabs Academy Web Development Bootcamp

Cambridge IGCSE in English Language

PROJECTS

E-commerce Management System

Built a full-stack e-commerce platform with user authentication, product management, and an admin dashboard.

Used React for the frontend and Node.js with MongoDB for the backend.

Barber Appointment Application (Lemo App)

- Designed and developed a scheduling application for barbers, allowing them to manage appointments and send SMS reminders.
- Leveraged React for the UI and Express.js for the backend.
